

NX voted #1 MCAD software by your peers on G2!

September 6, 2023 • 5 MIN READ

By Jamie Tyler

Introduction

It's always important to review how NX™ software is seen in the community. User perception is critical; it's a reflection on how well we're doing, and whether our continuous release cycle is resonating with you. G2's peer review results for spring and summer 2023 suggests we're making great strides. Let's take a closer look...

Who are G2 and what do they do?

G2 is one of the largest and most trusted software marketplaces. More than 80 million people annually – including employees at all Fortune 500 companies – use G2 on a regular basis to help them make smarter software decisions that are based upon authentic peer reviews from users just like you.

Why are peer reviews critical?

Peer reviews are a great way for prospective customers, and even existing customers, to compare products and develop a better understanding for how those products will fit within their own ecosystem. This is made possible by real people, real discussions, and real reviews. But peer reviews are not just helpful to the end customer. Consolidating the insights from per reviews also enables us to see how NX is performing against other solutions in the market, and it helps us to gain insights that we might not have otherwise obtained through our own communication channels.

How did NX do?

There's only one place to start; we're thrilled to announce that NX was ranked #1 best mechanical computer-aided design (MCAD) software! It's a great testament to the continuous work from the NX development team, and how our solutions continue to be recognized by our peers.

#1 | Best mechanical computer-aided design (MCAD) software

Since we're covering spring and summer 2023, let's take a closer look at the badges we've won for these seasons. 📌

Spring 2023 🌱

Let's start with the awards we've scooped for spring 2023. In total, we've won 15 awards, spanning across a range of areas. We've been recognized as a momentum leader for MCAD, an MCAD leader in Europe, India and the Asia Pacific, as well as a leader in 3D printing. Take a look at all of the awards we've won below. 📌

CAD leader

CAD leader mid-market

MCAD best relationship enterprise

CAD leader small business

MCAD leader Asia

MCAD leader Asia-Pacific

MCAD leader enterprise

A full list of Spring awards
